IDENTIFIERS	*Washington

ABSTRACT

This document consists of tables and figures detailing the status of and projections for public and private institutions of higher education in the state of Washington. The report considers university/college characteristics, access and participation rates, service level and student flow, off-campus programs, and special institutional goals and objectives. Following a brief introduction, chapter 1 provides enrollment highlights for the community and technical college system; chapter 2 contains information on the University of Washington-Seattle and the University of Washington evening degree program. Chapters 3 and 4 provide enrollment highlights for the University of Washington-Bothell and the University of Washington-Tacoma. Chapter 5 offers enrollment highlights for four University of Washington campuses: Pullman, Spokane, Tri-Cities, and Vancouver. Chapter 6 details enrollment highlights for Central Washington University; chapter 7 covers Eastern Washington University; chapter 8 covers Evergreen State College enrollments; and chapter 9 covers Western Washington University. Chapter 10 covers community programs offered in timber- and salmon-impacted areas; and chapter 11 covers demographics, enrollments, and degrees of students in public two- and four-year institutions. A directory of higher education institutions is appended. (CH)

APPENDIX

Directory of Higher Education Institutions:
Public Four-Year Institutions, Branch Campuses, and Programs; Other Higher Education Agencies; and Community and Technical Colleges A-1

Introduction

This Supplement to *Higher Education Enrollment Statistics and Projections 1999-2001 Biennium* is published by the Forecasting Division of the Office of Financial Management (OFM).

The publication includes Washington public higher education enrollment highlights for the community and technical college system and each four-year institution. Enrollment data for two University of Washington (UW) branch campuses and one evening program, and three Washington State University (WSU) branch campuses are shown separately.

The Tri-Cities University Center became WSU Tri-Cities in Fall 1989. The Intercollegiate Center for Nursing Education (ICNE) at Spokane remains a consortium involving WSU, Eastern Washington University (EWU), and Whitworth College. ICNE enrollment was included in each participating school. Starting Fall 1993, the EWU enrollment at ICNE Spokane has been included in WSU main campus total.

To prepare this report, all public higher education institutions were asked to submit a brief description of institutional enrollment highlights covering the following areas:

- University/college characteristics,
- Access and participation rates,
- Service level and student flow,
- Off-campus programs, and
- Special goals and objectives (optional).

In this publication, the summary of annual average and fall term headcount and full-time equivalents (FTE) for both two- and four-year institutions extends back to 1970. Beginning 1993, the five Washington technical college enrollments have been included with the community college system. The county participation rate data, which indicate student access by geographic origin, are based upon Fall 1998 enrollment statistics. The student flow data, which indicate where students were previously enrolled by type of institution, begin in 1985 for each main campus four-year institution. For branch campuses, the data begins when schools started.

The last chapter includes current demographic, enrollment, and degree statistics for the four-year institutions. Data are organized to provide detail by individual school, main campus subtotal, branch campus subtotal, and all campus total.

A list of contact points for each public two- and four-year institutions is shown in the appendix. Names, addresses, phone/fax numbers, and internet addresses are included in the directory.

The main sources of enrollment data are from:

- State Board for Community and Technical College (SBCTC) Management Information System (MIS), and
- Higher Education Enrollment Reports (HEER) from each four-year public institution.

All figures represent state-funded enrollments only. Data for self-sustaining, no-credit courses, correspondence courses, ROTC, faculty/staff/state employees enrolled under fee waiver programs, and other non-state funded enrollments are excluded.

Chapter 1

Community and Technical College System Enrollment Highlights

WASHINGTON'S COMMUNITY AND TECHNICAL COLLEGE ACT OF 1991 provides for a state system of community and technical colleges separate from both the public secondary schools and four-year institutions. The act requires that the colleges "offer an open door to every citizen, regardless of his or her academic background or experience, at a cost normally within his or her economic means" (RCW 28B.50.020[1]).

Each college district is required to "offer thoroughly comprehensive educational, training and service programs to meet the needs of both the communities and students served by combining, with equal emphasis, high standards of excellence in academic transfer courses; realistic and practical courses in occupational education, both graded and ungraded; community services of an educational, cultural and recreational nature; and adult education" (RCW 28B.50.020[2]). Technical colleges are exempt from the academic transfer requirement.

Access and Participation Rates

In Fall 1998, the college system served 177,736 unduplicated headcount enrollments in the state funded courses for a full-time equivalent (FTE) count of 113,730 students. For the full year 1997-98, colleges served 188,011 headcount enrollments, or 117,925 FTEs (see Table 1). The figures include technical colleges. Prior to 1993, technical college enrollments were excluded from the data collection.

State funded courses include those supported by General Fund-State dollars as well as natural resource waivers (500 funded), worker retraining (6,200 funded), and excess enrollments. Excess enrollments are students served by colleges over and above the regular state allocation.

Economic and labor market growth and contraction varies by region and county. Average participation in the system is about four students for every 100 adults in the state. Lower rates tend to be in remote counties without a main campus. Higher rates tend to be in counties with main campuses.

Student Characteristics

The racial composition of the student population in Fall 1998 was more diverse than that of the state as a whole; 25 percent of students at community and technical colleges were racial or ethnic minorities,[1] compared to 17 percent of the general population. The student population was 57 percent female. The median age of students was 27.7, up from 27.5 the year before.

---

[1] Black/African American, American Indian, Asian or Pacific Islander, or Hispanic Origin.

Off-Campus Programs

The 32 community and technical colleges provide facilities for academic instruction, workforce training, developmental education,[2] adult basic education, and English as a second language. The system, through off-campus programs, targets education and training opportunities for people that have limited access to college facilities. Broadening the scope of instructional programs available through off-campus classrooms is just one way colleges are improving educational access and availability. Distance learning, providing student access without a main or branch campus, accounted for 3,011 FTEs in Fall 1998.

2 Developmental education classes are those offered in basic subjects (i.e., math, English, basic skills) which prepare students for college-level work.

NOTES:
[1]All funding sources; state-funded headcount was not available.
[2]State-funded and contract; state-funded headcount was not available.
[3]Includes Timber Worker Displacement (TW) enrollment.
[4]Includes Timber Worker Displacement (TW), Workforce Training (WFT), and Technical College (TC) enrollments.
[5]Figures in parentheses are Technical College (TC) enrollment without Timber Worker Displacement (TW) or Workforce Training (WFT) enrolled in TCs. TC enrollments are excluded prior to 1993.
[6]Includes TW, WFT, TC, and Private Career Colleges (PCC).
N/A = Not Available.

Chapter 2A

University of Washington Seattle Enrollment Highlights

THE UNIVERSITY OF WASHINGTON (UW) was founded in 1861. Since Fall 1954, state funded enrollment has increased from 16,164 students to the current level of 32,911 students in Fall 1998. Table 3 shows annual average and fall headcount and FTEs, 1970-71 through 1998-99.

Access and Participation Rates

Residents of three counties (King, Snohomish, and Pierce) account for over 76 percent of all students attending the University in Fall 1998. At the time of initial application, 14,501 students were residents of King County, 2,402 were residents of Snohomish County, and 2,031 were residents of Pierce County. The University is located in King County. (See Table 4 and Figure 2.)

Service Levels and Student Flow

Women comprised 51 percent of the undergraduates, 49 percent of the graduates, and 54 percent of the professional students enrolled in the Fall quarter 1998. Post-baccalaureate enrollment has declined as a result of moving the teaching certificate program to the master's level and the Pharmacy degree to the professional category.

Of 9,196 new students enrolled in the Fall quarter 1998, 4,259 came from high schools, 1,474 from Washington community colleges, 1,113 (673 graduate students) from Washington four-year schools, 2,350 (590 graduate students) from out-of-state institutions, and 785 (179 graduate students) were returning students. The total of new graduate students entering in Fall was 2,442. (See Table 5.)

The University has one of the highest retention rates among the main campuses of four-year institutions. Of all students attending in Spring quarter 1998, 76 percent returned the following Fall. (See Table 5.)

Off-Campus Programs

Off-campus non-state funded credit programs are provided through University Extension and Televised Instruction in Engineering (TIE). University Extension served 2,632 headcount (826 FTE) students off campus in Fall 1998 at school districts, hospitals, and other off-campus locations. The TIE program served 225 headcount (69 FTE) students in Fall 1998 at various off-campus business locations. Only non-credit courses were offered at the Downtown Extension location.

In addition, UW also provides on-campus extension programs. The on-campus extension programs served 1,181 headcount (287 FTE) students in Fall 1996.

Chapter 2B

University of Washington Evening Degree Program Enrollment Highlights

Introduction

The University of Washington Evening Degree Program provides bachelor's degrees in the social sciences, humanities, anthropology, business administration, communications, sociology, mathematics, English, political science, history, psychology, and master's degrees in construction management, professional accounting, business administration, computer science and engineering, education, library and information science, public affairs, and social work.

The enrollment in Fall 1998 was 930 students or 758 FTEs. (See Table 6 for the program enrollment history.)

Access and Participation Rates

Eighty-one percent of the University of Washington Evening Degree Program headcount in Fall 1998 was from King County. The remaining 19 percent was from Snohomish County (8 percent), from Pierce County (4 percent), and other Washington counties (7 percent). (See Table 7 and Figure 3.)

Service Levels and Student Flow

Out of 217 new students enrolled Fall 1998, 66 transferred from community colleges, 44 (35 graduate students) transferred from Washington four-year institutions, and 106 (88 graduate students) transferred from out-of-state institutions. Another 54 (one graduate student) are former students from unidentified institutions. The total of new graduate students entering in Fall 1998 was 129.

The rate of retention is quite high, with 659 students, or 81 percent, continuing in Fall 1998 from the previous Spring term. (See Table 8.)

Chapter 3

University of Washington Bothell Enrollment Highlights

Introduction

The University of Washington Bothell was established in Fall 1990. It provides upper division undergraduate education leading to bachelor's degrees in computing and software systems, liberal studies, nursing, and business administration, a K-8 teacher certification program, and a master's degrees in education and business. Plans are to add other undergraduate and graduate programs in the future as funds are appropriated. Masters' programs are under development in engineering, liberal studies, and an education certification program is planned to complement the master of education degree.

Fall 1998 enrollment was 1,191 students for 866 FTEs. (See Table 9 for the campus enrollment history.)

Access and Participation Rates

Student participation in King and Snohomish Counties accounts for 93 percent of total enrollment. The remaining 7 percent is from other locations. (See Table 10 and Figure 4.)

Service Levels and Student Flow

Out of 418 new enrolled students in Fall 1998, 206 transferred from Washington community colleges, 78 (22 graduate students) from Washington four-year institutions, and 129 (20 graduate students) from out-of-state institutions. An additional 45 (4 graduate students) fall into other categories.

The retention rate is 66 percent. (See Table 11.)

Chapter 4

University of Washington Tacoma Enrollment Highlights

Introduction

The University of Washington Tacoma was established in Fall 1990. It provides upper division undergraduate education in business, liberal studies, nursing; graduate programs in education, nursing, and social work; and a post-baccalaureate teacher certification program in elementary education. Plans are to add undergraduate and graduate programs in the future as funds are appropriated. An additional baccalaureate program is planned in engineering and a master's program is under development in social work.

Fall 1998 enrollment was 1,295 students for 964 FTEs. (See Table 12 for the campus enrollment history.)

Access and Participation Rates

The University of Washington Tacoma serves the South Puget Sound area. Sixty-one percent of the total enrollment, 780 students, is from Pierce County. Eighteen percent is from King, 8 percent from Kitsap, 7 percent from Thurston, and the remaining 6 percent from nearby counties. (See Table 13 and Figure 5.)

Service Levels and Student Flow

Out of 579 new students who transferred to the University of Washington Tacoma in the Fall 1998, 287 transferred from two-year institutions, 135 (82 graduate students) were from four-year institutions, and 155 (18 graduate students) last attended out-of-state institutions. (See Table 14.) Another 24 were either former returning students or from unidentified institutions.

The total of new graduate students who entered in Fall 1998 was 100.

Chapter 5

Washington State University

Introduction

Washington State University (WSU) was founded in 1890. Throughout its history, WSU has been a comprehensive institution of higher learning encompassing the liberal arts, professional education, basic and applied research, and extended education and public service. The University is the state's land grant research university, offering graduate and undergraduate education in a broad range of subject areas.

In 1979, the Legislature authorized the establishment of WSU branch campuses in Spokane, Tri-Cities, and Vancouver. Academic programs were already in place at all three centers and the legislation formalized and elevated the status of those centers to branch campuses.

Today, WSU is a multi-campus institution with campuses in Pullman, Spokane, Tri-Cities, and Vancouver, and centers in Spokane and Yakima (the Intercollegiate Center for Nursing Education) and Seattle (Seattle Center Hotel and Restaurant Administration). WSU also has Cooperative Extension offices in all 39 counties, four research centers, and 24 Small Business Development Centers statewide, and is responsible for administration of the Washington Higher Education Telecommunications System (WHETS), which transmits courses to various locations within the state.

Chapter 5A

Washington State University Pullman Enrollment Highlights

Introduction

Washington State University (WSU) Pullman is one of the largest residential universities west of the Mississippi. Nearly one-half of the students in Pullman live in university housing, fraternities, or sororities. The academic structure includes eight colleges, a graduate school, and the Intercollegiate Center for Nursing Education (ICNE).

The Fall 1998 enrollment for WSU Pullman was 17,404 students, or 17,898 FTEs. (See the university enrollment history in Table 15.) Beginning in Fall 1996, WSU Pullman enrollments also include students enrolled in Extended Degree Programs (EDP).

Access and Participation Rates

The Pullman campus draws the majority of its enrollment from throughout the state. Four counties – King, Spokane, Pierce, and Whitman – account for 50 percent of all in-state students attending the Pullman campus. (See Table 16 and Figure 6.)

Service Levels and Student Flow

Washington State University Pullman has historically had a higher share of its students enter directly from high school and is, therefore, characterized by a young student body. For the Fall 1998 semester, the average high school GPA of regularly admitted students was 3.41. The retention rate has been among the highest in the state, accounting for 74 percent of the previous Spring total enrollment. (See Table 17.) The vast majority of WSU students are fully enrolled and students tend to carry heavy academic loads.

Off-Campus Programs

Intercollegiate Center for Nursing Education

The Intercollegiate Center for Nursing Education (ICNE), located in Spokane, was established in 1968 and is a consortium of eastern Washington institutions (WSU, Eastern Washington University, and Whitworth College). The Center provides nursing education to 377 students at both the undergraduate and graduate levels. More than one-half of the students are enrolled as WSU students. Approximately 18 percent of the WSU ICNE students are graduate students. The ICNE delivers programs to Vancouver, Tri-Cities, Wenatchee, and Yakima through the use of Washington Higher Education Telecommunications System (WHETS) and commuting faculty. Students attending the ICNE are drawn from all over eastern Washington with the majority coming from Spokane and Yakima Counties. Over 82 percent of ICNE students are full-time students and over 45 percent are at least 25 years of age.

Extended Degree Programs

Extended Degree Programs (EDP) deliver selected degree programs, and semester-based and flexible enrollment (correspondence) credit courses through distance learning technologies to adult learners in the state of Washington and around the world. (Up to 25 percent of the credits for a WSU baccalaureate degree may be taken through flexible enrollment courses.) Currently EDP enables the College of Liberal Arts to deliver a BA in Social Sciences, the College of Agriculture and Home Economics to deliver a BA in Human Development, and the College of Business and Economics to deliver a BA in Business Administration.

Conferences and Institutes

Conferences and Institutes (C & I) plans and conducts noncredit programs, including conferences, institutes, seminars, trade shows, craft fairs, and vocational schools at sites throughout the state of Washington and beyond. Offices are located in Pullman and Puyallup. Clients include business and industrial firms, government agencies, schools, professional associations and others interested in increasing their knowledge and professional competencies. C & I also conducts programs for faculty development within WSU and national teleconferences on issues of importance to higher education institutions and the communities in which they reside.

Washington Higher Education Telecommunications System

Washington Higher Education Telecommunications System (WHETS) was constructed in 1983-84 and offered its first courses in 1985. The interactive microwave system allows courses to be broadcast simultaneously to several campus sites. The system serves Pullman, three branch campuses (WSU Spokane, WSU Tri-Cities, and WSU Vancouver), Seattle Central Community College, Wenatchee Valley College, and the Boeing Corporation. It has grown from a total of 14 WSU courses delivered in 1985-86 to 186 courses in 1997-98. Course enrollments have grown over the same period from 103 to 5,517 students.

WHETS allows off-campus locations to offer a much broader array of courses and programs than if they were dependent on resident faculty for course delivery. The augmentation to resident faculty courses ranges from 20 percent to 40 percent of courses being delivered via WHETS.

Chapter 5B

Washington State University Spokane Enrollment Highlights

Introduction

In Fall 1998, Washington State University (WSU) Spokane offered 19 academic programs to approximately 395 students in engineering, architecture, computer science, education, pharmacy, criminal justice, interior design, food science and human nutrition, speech pathology, audiology, health policy and administration, construction management, landscape architecture, educational administration, engineering management, and technology management.

WSU continues to address the needs of the Spokane health community through baccalaureate, master's degrees, and a professional doctorate degree. WSU Spokane coordinates the Health Research and Education Center, the Office of Rural Health, and the Washington Institute for Mental Illness Research Training.

The Fall 1998 enrollment of WSU Spokane was 395 students for 417 FTEs. (See Table 18.)

Access and Participation Rates

Forty-seven percent of the campus total in-state enrollment in Fall 1998 was from Spokane County. The transfer of fifth-year programs in architecture, pharmacy, landscape architecture, and construction management draws many students from Pullman to the Spokane campus. Of the remaining 53 percent, 17 percent were from eastern Washington and 36 percent were from western Washington. In addition, there were 55 out-of-state students plus 23 international students. This mix reflects the specialized nature of many of the Spokane programs, which draw regionally rather than locally. (See Table 19 and Figure 7.)

Service Levels and Student Flow

Out of 395 students, 62 transferred from Washington four-year institutions and 28 from out-of-state institutions. The number of continuing students was 291, accounting for 73 percent of the previous Spring enrollment. (See Table 20.)

Approximately 61 percent of students attend WSU Spokane on a full-time basis. The other 39 percent for the most part, represent older, part-time, placebound students completing graduate degrees while working full-time. Their average age is 30, slightly lower than the other campuses due to the higher percentage of traditional, full-time students. These students tend to be in fifth-year programs, completing their undergraduate degrees and certification, or in graduate programs unique to WSU Spokane.

Chapter 5C

Washington State University Tri-Cities Enrollment Highlights

Introduction

Washington State University (WSU) Tri-Cities was created in July 1989. Legislation consolidated the activities of the Tri-Cities University Center, previously supported by five institutions (University of Washington, Central Washington University, Eastern Washington University, Oregon State University, and WSU). Since 1993, all degrees offered at WSU are from WSU. The campus has responsibility for upper-division and graduate education. It serves students primarily from Benton, Franklin, and Walla Walla Counties. The majority of programs are in engineering and technical areas, reflecting the five-decade history of the campus and its partnerships with the Tri-Cities scientific community. Other program areas include business, education, humanities, sciences, social sciences, nursing, and agriculture.

The programs with the largest enrollment in Fall 1998 were humanities and social sciences combined (23 percent), education (23 percent), engineering (22 percent), and business (22 percent). Most of the WSU Tri-Cities undergraduate students are community college and four-year institution transfers who are placebound, working students completing degrees. Graduate students constitute almost 29 percent of the student body.

The Fall 1998 enrollment was 1,094 students or 604 FTEs. (See Table 21.)

Access and Participation Rates

Approximately 91 percent of in-state students are drawn from the Tri-Cities service area counties of Benton, Franklin, and Walla Walla. Almost 4 percent of students are from neighboring Yakima County. In addition, there were 15 out-of-state students. (See Table 22 and Figure 8.)

Service Levels and Student Flow

Over 72 percent of WSU Tri-Cities students attend part-time. Many are older placebound working adults. The number of younger students is increasing, however, as more students opt to live at home while attending college. The average age of WSU Tri-Cities students is over 30.

Out of 1,094 total students attending WSU Tri-Cities fall semester, 165 transferred from Washington community colleges, 128 from Washington four-year institutions, and 31 from out-of-state institutions. Of 1,148 students attending the previous Spring semester, 656 continued their enrollment, accounting for a 57 percent retention rate. (See Table 23.)

Chapter 5D

Washington State University Vancouver Enrollment Highlights

Introduction

Washington State University (WSU) Vancouver became a branch campus in 1979 and has been separately funded since Fall 1989. In 1983, it became a center for educational programming by WSU and other institutions in Southwest Washington. Original academic programming by WSU in Vancouver concentrated in the high technology disciplines. With the closure of The Evergreen State College programs in Vancouver in 1988, WSU began offering undergraduate programs in general studies, business, and liberal arts. The focus of growth at WSU Vancouver is now in upper division programs and specialized graduate offerings.

In Fall 1998, about 1,500 students were served by twelve undergraduate and seven graduate degree programs. The undergraduate degree programs include English, biology, environmental science, social sciences, humanities, psychology, business administration, nursing, human development, public affairs, manufacturing engineering, and natural resource science. Graduate degrees are offered in nursing and technology management. Master's degrees are offered in public affairs, engineering management, business administration, education, and teaching.

Programs proposed for the 1999-2001 Biennium include undergraduate degrees in computer science, science, electrical engineering, electronic communication, and masters programs include biology, environmental science, and communications. One focus will be on issues relating to natural resource management providing support to the natural resource industry of the region.

The Fall 1998 enrollment was 1,486 students for 983 FTEs. (See Table 24.)

Access and Participation Rates

Seventy-seven percent of WSU Vancouver in-state students are drawn from Clark County. In total, 93 percent of students are from the six-county Southwest Washington service area. Seventy-three students (4.9 percent) are from out of state, primarily from Oregon. (See Table 25 and Figure 9.)

Service Levels and Student Flow

Over 53 percent of WSU Vancouver students attend part-time.

The average age of Vancouver students is 32 years, representing a student body which is older, employed full-time, and placebound by job or family. Out of 1,486 students enrolled in Fall 1998, 262 transferred from Washington community colleges, 157 from Washington four-year institutions, and 92 from out of state. The campus retention rate was 67 percent. (See Table 26.)

Chapter 6

Central Washington University Enrollment Highlights

Introduction

Central Washington University was founded in 1891 as a state normal school. It has since evolved into a comprehensive, regional university with over 100 bachelor's degree programs and 30 master's degree programs. Central Washington University has the largest teacher preparation program in the state, which certified 550 teachers in 1997-98. Nearly one-fourth of the undergraduate degrees conferred by the university are earned through the School of Business and Economics, which has a highly regarded program in accounting. The university offers a broad diversity of programs in the humanities, sciences, and social sciences, including several interdisciplinary majors and minors. The William O. Douglas Honors College offers gifted undergraduates a four-year enriched general studies program in the great books of world civilization, with a special emphasis on the fundamental works of western civilization. The university trains professionals in such fields as construction management, electrical and mechanical technology, emergency services, flight technology, journalism, law enforcement, medical technology, nutrition, office systems, social services, and workplace safety. Pre-professional programs are available to prepare students to seek professional degrees in dentistry, dietetics, engineering, law, medicine, occupational therapy, optometry, pharmacy, physical therapy, or veterinary medicine. Students at Central Washington University may study elsewhere for up to a year at institutions in 40 countries and 48 states.

Graduate programs at Central Washington University provide advanced study in fifteen fields for professional educators. Graduate programs also exist in several fields of the arts, humanities, and sciences, as well as in family and consumer sciences, organization development, physical education, and natural and cultural resource management.

Access and Participation Rates

Student enrollment, as measured by annual average FTEs, has been rising since the 1978-79 academic year. From that year through the 1997-98 academic year, annual average FTE enrollment increased from 5,711 to 7,474 FTEs (see Table 27). Most of this growth occurred during the years from 1988-89 through 1993-94. The increased enrollment is due mainly to rising headcounts of transfer and continuing students (see Table 29; for further detail, see discussion below of service levels and student flow). However, headcount increases do not fully explain the rise in FTEs. Students have also been enrolling for increasingly heavy credit loads. Between academic years 1978-79 and 1997-98, annual average FTE per head has risen, albeit unsteadily, from .77 to .92.

Ninety-five percent of the students attending the university come from the State of Washington. Of these, most come from the major population centers west of the Cascades. For the fall quarter of 1998, residents of west-side counties accounted for 63 percent of all

in-state students. King County provided 2,189 students, Pierce County provided 801, and Snohomish County provided 626 (see Table 28). Although most students come from the western counties, Central Washington University draws a disproportionate share of its students from the central counties of the state (see Figure 10). However, because the central counties have relatively small populations, the numbers of students from these counties do not match the numbers coming from the Seattle/Tacoma metropolitan area. Kittitas County, where the main campus is located, provided 854 students for the fall quarter of 1998. The adjacent counties of Yakima and Chelan provided 871 and 290 students respectively (see Table 28).

Service Levels and Student Flow

For fall quarter 1998, Central Washington University enrolled 965 students directly from high school, 1,491 transfers from two- and four-year institutions, 240 returning students, and 148 students from unidentified institutions. Retention from spring quarter 1998 to fall quarter 1998 was 5,511 or seventy-one percent (see Table 29.)

Over the period from 1985 to 1998, the university experienced notable increases in enrollments of transfer and continuing students (see Table 29). For the seven fall quarters from 1985 through 1991, Central Washington University averaged 1,149 transfer students and 4,733 continuing students. The averages for the seven fall quarters from 1992 through 1998 are 1,495 transfer students and 5,463 continuing students. The numbers of new freshmen have shown no strong rising trend, but have instead averaged around 1,000 per fall quarter.

Off-Campus Programs

Placebound students who have completed associate degrees can select from ten bachelor's degree programs offered through Central Washington University's extended degree centers in Lynnwood, SeaTac, Steilacoom, Yakima, and Wenatchee. A Master of Science in Organization Development is also offered at SeaTac. These centers enrolled 978 FTEs for fall quarter 1998.

Chapter 7

Eastern Washington University Enrollment Highlights

Introduction

Eastern Washington University (EWU) was founded in 1882 and now offers nearly 200 undergraduate degrees and degree options and 25 graduate programs. The University is organized into four colleges: Business Administration; Education and Human Development; Letters, Arts, and Social Sciences; and Science, Mathematics, and Technology. EWU also has a consortium relationship with the Intercollegiate Center for Nursing Education.

Annual attendance has averaged about 7,500 students during the past five academic years. Fall 1998 enrollment was 7688 students or 7,516 FTEs. (See Table 30.)

Access and Participation Rates

Located in Cheney and Spokane, EWU serves students from eastern Washington as well as the entire state. Among Fall 1998 in-state students, 49 percent were from Spokane County (where the university is located) and about 5 percent were from King County. (See Table 31 and Figure 11.) Over 10 percent of Eastern students are from out of state and foreign countries.

Over 11 percent of students are racial or ethnic minorities.

Service Levels and Student Flow

Out of 7,688 students enrolled in Fall 1998, 861 came directly from high schools, 1,353 were from two- and four-year institutions, 234 were former returning students, and 5,240 were continuing students. (See Table 32.)

Spokane Programs

Eastern Washington University offers a variety of programs in Spokane at its Spokane Center, at Riverpoint and other locations. The Spokane Center opened in 1983. The Spokane Center, which was extensively renovated in 1992, offers a variety of undergraduate and graduate programs and courses. Health Science programs, such as, physical therapy, dental hygiene and communication disorders are located in Spokane.

EWU occupies the Riverpoint Phase I classroom building with Washington State University. Since Spring 1996, the College of Business and Public Administration has offered degrees in business, urban and regional planning, and public administration at the Riverpoint campus.

Over 1,482 undergraduate and graduate students were served in Spokane during Fall 1998.

Chapter 8

The Evergreen State College Enrollment Highlights

Introduction

The Evergreen State College (TESC) was founded in 1971 and emphasizes an interdisciplinary approach to instruction. Since the school opened in Fall 1971, enrollment has increased from 1,178 students to 4,194 students in Fall 1998. (See Table 33.)

Access and Participation Rates

Residents of four counties, King, Pierce, Thurston, and Kitsap, account for 75 percent of all in-state students attending the College in Fall 1998. At the time of initial application, 669 students were residents of King County, 1,184 were residents of Thurston County, 307 were residents of Pierce County, and 109 were residents of Kitsap County. (See Table 34 and Figure 12.)

Service Levels and Student Flow

Out of 4,194 Fall 1998 enrollment, 521 were directly from high schools, 1,092 were from two- and four-year institutions, 353 were former returning students, and 2,228 were continuing students. (See Table 35.) Fifty-one percent of the College's enrollment was age 22 or younger, and 23 percent was 30 or older.

Off-Campus Programs

TESC maintains two off-campus undergraduate degree programs, the Tacoma Program which opened in 1982, and the Tribal Program which opened in 1994. The Tacoma Program enrolled 156 students in Fall 1998, 60 percent of whom were racial or ethnic minorities. The Tribal Program enrolled 32 students, 31 of whom were Native Americans and residents of western Washington.

Chapter 9

Western Washington University Enrollment Highlights

Introduction

Western Washington University (WWU) was founded in 1893 and serves the regional needs of western Washington residents. Study is organized into a Graduate School, the College of Arts and Sciences, the College of Business and Economics, the College of Fine and Performing Arts, Fairhaven College, Huxley College of Environmental Studies, and Woodring College of Education.

In Fall 1998, enrollment was 11,655, or 11,062 FTEs. (See Table 36.)

Access

Residents of four counties, King, Pierce, Snohomish and Whatcom, account for 64 percent of all in-state students attending WWU in Fall 1998. At the time of initial application, 3,289 students were King County residents, 1,026 were residents of Pierce County, 1,173 were residents of Snohomish County, and 1,397 were residents of Whatcom County. The University is located in Whatcom County, but consistently enrolls students statewide. (See Table 37 and Figure 13.)

Service Levels and Student Flow

Due to the University's large number of freshman entrances, and lack of doctoral programs, the highest percent of its student body is 17 to 22 years of age.

Out of 11,655 students enrolled in Fall 1998, 2,193 were directly from high school, 1,318 were transfers from two- and four-year institutions, 442 were former returning students, and 7,682 were continuing students. Data on student flow during Fall 1985-98 is shown in Table 38.

Extension Programs

WWU offers several extension programs off-campus and in Bellingham. Most of these programs are offered on a self-sustaining basis. In Fall 1998, 1,120 students were enrolled in extension programs through the Center for Regional Services (CRS) in Woodring College of Education, and through the University Extended Programs (UEP).

Extension programs are offered in electronics engineering technology, environmental studies, vehicle research, speech pathology/audiology, human services, teacher education, educational administration, and adult education at six different sites in western Washington. Some sites offer more than one program. Enrollment by site is: Bellingham, 254 students; Bremerton, 90; Everett, 322; Oak Harbor, 36; Port Angeles, 15; and Seattle, 292, and other sites, 98.

Two state-supported programs are offered at off-campus sites: environmental studies at Port Angeles and Bremerton, and electronics engineering technology in Seattle.

Chapter 10

HECB Timber and Salmon Impacted Communities Program

Introduction

The Higher Education Coordinating Board (HECB) upper division education program serving Timber Impacted Communities has been funded since Fall 1992. In 1995, the program was expanded to serve Salmon Impacted Communities as well. The program was designed to provide opportunities for residents of timber and salmon impacted communities to complete a bachelor's degree.

Initially, the HECB contracted with Western Washington University (WWU) to offer site-based human services and environmental science programs in Port Angeles and with Washington state University (WSU) to offer a Port Angeles-based criminal justice program. During the 1995-97 and 1997-99 biennia, the HECB contracted with WWU to offer a site-based BA in Environmental Policy and a BS in Environmental Science in Port Angeles and with WSU to offer BA in Social Sciences in all timber/salmon impacted communities via telecommunications. Table 39 shows 259 students for 147 FTEs for WWU and WSU programs combined in Fall 1998.

Access and Participation Rates

The largest number of WSU enrollees reside in Clallam County, followed by residents of Clallam and Jefferson Counties. The largest number of WWU enrollees reside in Clallam County, followed by residents of neighboring counties. (See Table 40.)

Service Levels and Student Flow

Admission to the program normally requires prior completion of an associate degree or a strong general education background. As a result, most students are community college transfer students. The program's retention rates compare quite favorably with main and branch campus enrollments.

Student Characteristics

Most program participants are place- and time-bound adults in their late 30s or early 40s. Many are unemployed or underemployed and expect the attainment of a bachelor's degree will advance their quality of life and career opportunities.

Off-Campus Programs

WSU B.A. in Criminal Justice in Clallam County
B.A. in Social Sciences in five timber impacted counties
September 1992-93

WSU B.A. in Social Sciences in 12 timber impacted counties
September 1993-August 1994

WSU B.A. in Social Sciences in all timber impacted counties
September 1994-June 1995

WSU B.A. in Social Sciences in all timber and salmon impacted communities
September 1995-August 1999

WWU B.A. in Human Services in Clallam County
B.A. in Environmental Science in Clallam County
January 1993-June 1993

WWU B.A. in Environmental Science in Clallam County
July 1994-June 1995

WWU B.A. in Environmental Science in Clallam County
September 1995-August 1997

WWU B.A. in Environmental Policy in Clallam County
B.S. in Environmental Science in Clallam County
September 1997-August 1999

Special Goals and Objectives

The program serves two statewide interests by enhancing upper-division educational opportunities for place- and-time-bound citizens in: 1) impacted timber communities, and 2) geographically isolated areas. The funding for the program also provides impetus for WWU to expand its off-campus offerings and the ability for WSU to deliver a distance learning program.

Chapter 11

Demographics, Enrollments, and Degrees of Students in Public Two- and Four-Year Institutions

Introduction

This chapter is a collection of enrolled student statistics for public two- and four-year institutions. It provides the most recent Fall term (1998) data by students' demographic, enrollment, and degree characteristics. The objective is to describe public two- and four-year institution students from a statewide perspective, as well as by individual four-year universities/college and branch campuses. Data are displayed separately for main and branch campuses where appropriate.

Demographic Characteristics

Tables 41 through 66 show students by gender and average age, resident/non-resident, Race and Hispanic Origin, and physical disability. Selected percentage calculations are given. The information on residency also groups students by class levels (i.e., lower class, upper class, graduate, and professional). Race and Hispanic Origin data use the 1990 census definitions (Version 1) and an alternate version which is compatible to the format used before the 1990 census definition (Version 2). The Mexican American and Other Hispanic categories are shown separately under the Hispanic category. Students using disabled student services are categorized by type of disability (e.g., deaf/hearing, mobility, speech/language, or other impairments).

Enrollment Characteristics

Tables 67 through 71 provide information on students by credit hours enrolled, retention rates, and declared major area of study. For credit hours enrolled, data include part-time and full-time students by class levels. For retention rates, the tables show percentages as well as number of students who were enrolled the previous spring term and who continue their enrollment in the subsequent fall term for each student classification. For major area of study, declared major students are summarized into the Classification of Instruction Program (CIP) which is the category used by the National Center for Education Statistics (NECS). Note that there are a large number of undeclared/pre-major students, especially in lower classes. Table 72 shows FTE work load by course levels, by CIP disciplines, and by each four-year institution and branch campus.

Degree Characteristics

Tables 73 and 74 contain history of degree completion since 1980-81 by level. Four-year public and private institutions and community college completions are included in Table 73. Percentages of degrees awarded to total Fall term enrollment for public four-year institutions since 1980-81 are provided in Table 74.

[3]Spring Term Enrollees who continued enrollment in the following Fall Term.

[4]Percent of Spring Term enrollees retained in the subsequent Fall Term.

[5]For WSU Spokane, the greater number of Fall Term student retained from the previous Spring was due to relocating activities of continuing students within the school system. For other schools, it was caused by class adjustments due primarily to late approved transfer credits.
